COLSTAR

The
quality
of
excellence

After fifty years, the CLAUD BUTLER name still retains the mystique associated with the most sought after cycle frames in Great Britain. Available through selected stockists in the United States of America, CLAUD BUTLER maintain the unique design and engineering qualities of the true hand-built, light weight cycle frame using the world famous Reynolds butted 531 tubing to bring you a quality of excellence recognised by the connoisseur who wishes to stand out from the crowd.

THE DALESMAN

The Claud Butler Dalesman frameset is specially designed for the dedicated tourist. The 72° angles coupled with 41¼" wheelbase ensure comfort on those long tours together with safety and controllability when descending with full touring kit.

THE LADYDALE

The Ladydale is a new Claud Butler frameset, craftsman built for the girl who prefers not to use a conventional diamond frame. Twin lateral stays and carefully designed geometry ensures a frame that is rigid but comfortable and controllable under all conditions.

Price	\$	\$	\$	\$

Angles/dimensions/weights quoted are for frames in the middle of the size range. Smaller or larger frames will vary to provide acceptable overall geometry.

THE ITALIA

Despite its superb specification (including Reynolds 531 butted tubing with Campy ends) and expert engineering the Italia is a very reasonably priced frame. Easily the best competitive frame available today.

THE COLSTAR

The Claud Butler Colstar is ideal for the rider who combines touring, club riding and racing. The Colstar will accept fenders with either 700C HP's or sew-ups and is sufficiently upright and responsive to ensure 'personal best performance'.
